- Implemented responsive designs & layouts to improve UX.
- Developed and maintained multiple web applications using ReactJS, NextJS, Node and ExpressJS.
- Designed and implemented RESTful APIs.
- Boosted app performance and reliability by resolving bottlenecks.
- Collaborated with frontend developers and designers to integrate the backend module into the app.
- Helped colleagues, improving their coding skills and code quality.

Beyondscale Technologies Pvt Ltd (Aug 21 - Dec 21)

Hyderabad, India

Internship Web Developer

Got hands on experience of front end technologies and framework

Phoenix Softech Pvt Ltd (June 2020 - July 2020)

Madurai, India

Internship for 1 month where I was trained on web development using php fundamentals

PROJECTS

[FingolIndia.com](#)

- Created UI pages using tailwind css, complex forms
- Developed backend using node js, express and postgresql. Built secure RESTful API's

Government Websites

- This is an inventory and services management system built to automate the process of distributing, tracking, resolving issues of inventory and problems tracking for secretariats to deliver their services flawlessly. This platform onboarded secretariats, mandals, district, state authorities and vendors to achieve the goal.
- [vsws.co.in](#), [ggmp.vsws.co.in](#), [sankalpa.education](#), [pt.vsws.co.in](#), [cr.vsws.co.in](#), [sdg.vsws.co.in](#)

[Alignometer.com](#)

- This is a ranking platform for employees in an organization which includes scores to employees, performance indicators, leaderboards, team and individual scoring and evaluations.

[i4strategies.com](#)

- Multi capable industrial consulting firm that can assist your project by reducing cost, detecting fraud and waste, improving security and identifying risks before they become crises.

ValidateMe

- ValidateMe is a secure identity capture and verification tool used by businesses to help prevent fraud and identity theft
- Integrated AWS Cognito in mobile application

WeissAnalytics.com

- Created chart view, add multiple charts to compare. Used google maps api to plot houses. Created pluggable UI widgets.

Tyuts.com

- A fully interactive tutorial application where teachers can create courses and learners can learn & track progress like Udemy

Stock Management System

- The project's major goal was to keep track of inventory in a database by scanning QR codes on products. When the stock expires, it will notify the owner and give him a daily update in pdf format.
- My role in the project was to keep the design clean and include a QR code scanner.

Crop Protection System From Animals

- The focus of the project was based on surveillance with an animal ward-off system employed in farmlands in order to prevent agricultural lands vandalization by animals.
- My role in the project team includes C coding, PIC microcontroller and Wifi moduleIntegrations.

Event Planner using PHP and JavaScript

- A web page for event planning in a user-friendly way. Services of event planning are collectively accessible here. People can select the services they want to be handled by their choice.
- This is my individual project and I dealt with HTML, CSS, PHP and Javascript.

TECHNICAL SKILLS

- Frontend: Php, HTML, CSS, Javascript, Reactjs, Nextjs, React Native, Responsive Design, .ASP.NET, Tailwind CSS, ANTD, Native base
- Backend: Nodejs, Express, Postgres, Postman, API Design,
- Cloud & Deployments: AWS Service, Docker,
- Performance Optimization: Lazy Loading, Code splitting, Caching, Database indexing
- Others: Git, Windows, Linux, Python, C#, Dotnet

EDUCATION

Kalasalingam University of Research And Education (2017 - 2021)

Madurai, India

Bachelor of Engineering, Computer Science Engineering

Cumulative GPA: 6.53/10

PARTICIPATIONS AND ACHIEVEMENTS
