PROJECTS

Stock Management System

- The project's major goal was to keep track of inventory in a database by scanning QR codes on products. When the stock expires, it will notify the owner and give him a daily update in pdf format.
- My role in the project was to keep the design clean and include a QR code scanner.
- I implemented an intuitive user interface and seamlessly integrated a QR code scanning feature, ensuring a user-friendly experience while efficiently managing stock levels in the Stock Management System.
